

## **Terminus Media Announces the release of Full Color Anthology**

*October 1, 2007*

Atlanta, Georgia - Terminus Media LLC recently announced the release of its first full color comic book, "Evolution Special #1", adding to its critically acclaimed "Evolution" anthology series. The book is a 48 page full color title that contains four unique stories from the minds of a talented roster of writers and artists. Projecting its continued growth, the title of the comic, "Evolution Special #1", reflects the comics' recent change to a full color format from an earlier black and white offering.

The Evolution books are a great way to get our talent and ideas to the marketplace said Terminus Publisher and co-founder Mark Stancil, who, with a group of associates, launched the "Evolution" book series in 2004. With The Dragon's Horde, a premier Atlanta based comic book store, acting as their base of operations, this group of enterprising individuals sought to craft works which spoke to a wide tableau of comic book fans.

Terminus Media's first offering, "Evolution Book One", was a black and white 42 page anthology which cemented the group's foothold within comic book publishing. The books have since then grown in popularity, offering such acclaimed works as Nate Hill's and Wilfredo Torres' action packed and humor laced "The Gnome and The Boogeymen", and John Mc Guire III's and Paul Carter's prehistoric tale of survival of the fittest, "Forgotten Kings".

Since then Terminus has published four books featuring writers and artists from across the United States. Our book has no commercials, is full color, and has four different stories. There is something in there for everybody said Terminus Editor in Chief, and Dragons Horde owner, Tony Cade. Since its creation Terminus Media has produced work on comics, graphic novels, sequential art, and animated projects with the 2006 launch of its animation division, for a host of clients within the entertainment industry.

We started Terminus because we love telling stories said Mark Stancil. The independent comic book creator is in a unique position to bring originality to the entertainment industry. Terminus is all about creating an environment where people can grow and cultivate strategic relationships. This benefits Terminus and the people that we work with. "Evolution Special #1" and more information about Terminus Media can be found at [www.terminusmedia.com](http://www.terminusmedia.com).
